---

**Guy:**

**I have 2 Tank Trailers that appear to have been used to store oily water associated with tank trailer cleaning. We sampled for dioxin and furans and got some hits. It does not appear that the codes that you provided below cover this oily wastewater.**

**I am trying to figure out whether the hits are significant or not or have any regulatory requirements associated with them. I can send you the data to help me review if you could but I have seen nothing that would make me think that I need to be concerned from a disposal point of view.**

**It appears that the material can be sent for wastewater treatment and we are considering a company like Lonestar Ecology who pretreats the wastewater and then sends it the Gulf Coast Waste Disposal Authority. Any help you can give me would be great.**

**We only ran totals and RCI on the waste.**

**Gary,**

F027	Discarded unused formulations containing tri-, tetra-, or pentachlorophenol or discarded unused formulations containing compounds derived from these chlorophenols. (This listing does not include formulations containing Hexachlorophene synthesized from prepurified 2,4,5-trichlorophenol as the sole component.)	(H)
F028	Residues resulting from the incineration or thermal treatment of soil contaminated with EPA Hazardous Waste Nos. F020, F021, F022, F023, F026, and F027	
U124	110-00-9	Furan (I)
U213	109-99-9	Furan, tetrahydro-(I)
U124	110-00-9	Furfuran (I)

**Is this enough of a reason to look?**

**Guy:**

**Could you have one of your people chase this down for me relative to a D listed waste.**

**Joel:**

**Is there a regulatory reason to ever analyze for Dioxins and Furans? I can see maybe for risk assessment but for waste disposal?**

**Thanks**
